SUMMARY

Still in her relative infancy, this boat has and could continue to make a brilliant starter boat for short holidays or extended cruises. She is still smarting very tidy paintwork & benefits from routine service and maintenance work to the Vetus engine, and elsewhere whenever necessary. In addition, the hull benefits from epoxy-blacked paintwork, for better corrosion resistance. Distinctive due to her square (rather than the more conventional curved) cruiser deck providing a larger than average engine bay, plenty of deck space whilst cruising, and wind dodger extra safety for those small dogs or children. Entering into the cabin from the cruiser deck you will find the ample galley space (as she is a reverse layout) with plenty of storage & worktop space. Next we have a half dinette, raised and adjacent to the side doors (great for sunny days) & Becton solid fuel stove in the saloon backed-up by the Webasto compact diesel boiler to radiators. Good headroom and long sofa bed to match, are an added feature for this tidy boat.
